

DEV JARIWALA

Software Developer | Full-Stack & AI Automation

Surat, Gujarat | +91 9824155101 | devjari235@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year IT undergraduate and full-stack developer with hands-on experience building web applications (ASP.NET, React.js, Node.js) and practical AI automation systems (n8n, OpenAI API, Twilio). Comfortable working across the stack, from database design to API integration, with a strong interest in enterprise software and workflow automation.

TECHNICAL SKILLS

- **Languages:** Java, C#, JavaScript, Python
- **Frontend:** React.js, HTML, CSS, Bootstrap
- **Backend:** ASP.NET / ASP.NET Web Forms, Node.js, PHP
- **Databases:** MySQL, SQL Server, MongoDB, Firebase
- **AI & Automation:** n8n, OpenAI API, Twilio, REST APIs, AI Agents & Chatbots, Workflow Automation
- **Tools:** Git & GitHub

EXPERIENCE

Founder / AI Automation Developer, Fixera Automation

2026 – Present

- Built AI-powered WhatsApp assistants and voice agents for automated appointment booking using n8n, OpenAI API, and Twilio.
- Designed workflow automations integrating Google Calendar, Google Sheets, and Gmail for real-time scheduling and lead capture.
- Implemented REST API integrations to connect conversational AI systems with business data and third-party services.
- Developed AI-powered content generation workflows to automate repetitive business tasks.

Software Development Trainee, Alekhan Infotech Solutions Pvt. Ltd.

Apr 2025 – Jun 2025

- Worked on coding, debugging, and project implementation across assigned modules.
- Supported development and testing of applications alongside the engineering team.
- Collaborated with team members on assigned tasks and project delivery.

SELECTED PROJECTS

Society Management System | ASP.NET Web Forms, C#, SQL Server

- Built a centralized dashboard for residential societies covering member/flat records, maintenance payments, notices, polls, and expense/accounting tracking.
- Implemented secure role-based login with separate admin and resident access for day-to-day business workflow management.

Kiyara Botanics — AI WhatsApp Product Recommendation System | OpenAI, n8n, Twilio WhatsApp API, Google Sheets

- Real-world client project: built and deployed a live AI-powered WhatsApp assistant for Kiyara Botanics that converses with customers, understands their needs, and recommends relevant products.
- Automated lead/customer data capture into a connected dashboard and backend workflows, handling the end-to-end sales-support conversation for an active business.

AI Appointment Booking Agent | AI Voice Agent, n8n, Google Calendar, Gmail API

- Built a voice-based AI agent that collects appointment details, checks Google Calendar availability, books the slot, and sends confirmation via integrated APIs, orchestrated through n8n.

NutriLens — Smart Food Recommendation | React.js, Application Logic

- Built a food comparison app that highlights calories, protein, sugar, and fat to help users make informed, healthier food choices.

EDUCATION

MSc IT, Shree Ramkrishna Institute of Computer Education and Applied Sciences

2026 – Present

BSc IT, Shree Ramkrishna Institute of Computer Education and Applied Sciences (Sarvajanik University)

2023 – 2026

CGPA: 8.75
